The safe and natural choice for  
gastrointestinal support

# Gastrointestinal

## The microbiota

Within the digestive tract there is a delicate balance between good and bad bacteria. This complex ecosystem, known as the microbiota, plays a vital role in maintaining your pet's digestive and general health.

Digestive disturbances happen when there is an imbalance of the microbiota in the digestive tract (known as a dysbiosis). This can be due to a sudden dietary change, treatment with antibiotics or stress (for example after travelling or kennelling). Our unique combination of probiotic and prebiotics helps to support digestive function for healthier, happier dogs and cats.

## Probiotics

Protexin Veterinary's gastrointestinal products contain the EU-registered probiotic bacterium *Enterococcus faecium* (NCIMB 10415) 4b1707. Probiotics reduce the growth and harmful effects of bad bacteria, restore the balance of beneficial bacteria and support the immune system.

## Prebiotics

Prebiotics are non-digestible carbohydrates which stimulate the growth and activity of good bacteria in the digestive tract. Preplex® prebiotic is unique to Protexin Veterinary, and contains fructo-oligosaccharide (FOS) and acacia (gum arabic).

# Pro-Kolin Advanced

## Pro-Kolin Advanced

For the management of short-term digestive disturbances, Pro-Kolin Advanced acts quickly to support your pet's gastrointestinal health.

Pro-Kolin Advanced helps to provide an immediate response to digestive disturbances by:

- Restoring the balance of the microbiota in the digestive tract
- Firming up stools
- Soothing the gut lining

## Directions for use

Pro-Kolin Advanced contains highly palatable new and improved flavourings for dogs (liver flavour) and cats (chicken flavour).

You should give Pro-Kolin Advanced by mouth as directed below, for as long as recommended by your veterinary surgeon.

Weight of pet (kg)	Volume	Frequency
Pro-Kolin Advanced 15ml & 30ml		
<5kg	2ml	Twice daily
5-15kg	3ml	Twice daily
15-30kg	5ml	Twice daily
>30kg	7ml	Twice daily
Pro-Kolin Advanced 60ml		
25-35kg	6ml	Twice daily
35-45kg	8ml	Twice daily
>45kg	10ml	Twice daily

Pro-Kolin Advanced can be given up to three times daily, depending on severity.

# Pro-Kolin Enterogenic

## Pro-Kolin Enterogenic

**When animals suffer from long-term or recurrent digestive disturbance, healthy gut function is disrupted. Long-term management is needed to support gastrointestinal function and subsequent damage to the lining of the bowel.**

**Pro-Kolin Enterogenic helps to manage long term gastrointestinal sensitivities by:**

- Supporting normal gut function
- Repairing damaged intestinal tissue
- Providing and supporting the beneficial bacteria needed to restore gut health
- Maintaining Vitamin B12 levels, which are often depleted in long-term gastrointestinal disturbances

## Directions for use

Pro-Kolin Enterogenic should be administered for a minimum of 30 days and for as long as recommended by your veterinary surgeon.

Pro-Kolin Enterogenic is supplied in a 4g sachet and can simply be sprinkled onto food.

 	
Weight (kg)	Sachets per day
5kg or less	½
5-15kg	1
15-35kg	2
35kg or more	3

Pro-Kolin Enterogenic

The safe and natural choice for gastrointestinal support

# Pro-Fibre

## Pro-Fibre

**Pro-Fibre contains a highly effective balance of soluble and insoluble fibres, Preplex prebiotic and probiotics which help to restore the gut's natural balance.**

**Pro-Fibre contains soluble and insoluble fibres which together can help to:**

- Form softer stools with more volume
- Promote normal bowel movements
- Increase faecal bulk to encourage normal anal gland expression

## Directions for use

Pro-Fibre contains an artificial beef flavouring to make it easier to give to your dog or cat.

You should add Pro-Fibre to your pet's daily food, in the amounts shown in the table below, for as long as recommended by your veterinary surgeon.

	 
Weight (kg)	Measures per day
5kg or less	½ (5g)
5-15kg	1 (10g)
15-35kg	2 (20g)
35kg or more	3 (30g)

# Synbiotic D-C

## Synbiotic D-C

Dysbiosis, an imbalance of the microbiota, can be caused by antibiotics, gastrointestinal disease, stress and dietary changes to name a few. This can result in a disturbance of GI function.

Synbiotic D-C contains a high-level of probiotics and prebiotics to support your pet’s microbiota and prevent a dysbiosis from occurring.

### Directions for use

Give one capsule daily by mouth or as recommended by your veterinary surgeon.

Capsules can be given whole or opened and the contents sprinkled onto food.

# Cobalaplex

## Cobalaplex

Cobalaplex has been designed to help support normal serum cobalamin (vitamin B12) and folate (vitamin B9) levels.

Cobalaplex contains the optimum levels of cobalamin and folate to maintain normal bloods levels of these essential vitamins. It also contains Preplex prebiotics to help restore the gut’s natural balance.

### Directions for use

The capsules can be given whole or opened, and the palatable contents sprinkled onto food.

Weight (kg)	Number of capsules
<10kg	½ capsule per day or 1 capsule every other day
10-20kg	1 capsule daily
>20kg	2 capsules daily

The number of capsules can be increased or decreased as needed to maintain normal cobalamin (vitamin B12) levels. Your veterinary surgeon will be able to advise on this.
